DETAILED ACTION

Allowable Subject Matter

1. Claims 1-25 and 27-33 are allowed over prior art of record.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The instant application is allowed in view of the Terminal Disclaimer filed on May 25, 2005. In addition, the prior art of record neither anticipates nor renders obvious the claimed subject matter of the instant application as a whole either taken alone or in combination, in particular, prior art of record does not teach "an ion conductor comprising an oxide electrolyte and conductive material; an oxidizable electrode proximate the ion conductor; and an indifferent electrode proximate the ion conductor; wherein at least one of the ion conductor, oxidizable electrode, and indifferent electrode is formed within at least a portion of the via," as recited in claim 1, "filling the via with first electrode material; removing any excess first electrode material; forming an ion conductor overlying the first electrode material; and forming a second electrode material overlying the ion conductor," as recited in claim 9, "forming an ion conductor overlying the first electrode material, wherein the step of forming an ion conductor comprises exposing the first electrode to an oxidizing atmosphere to form an oxide ion conductor," as recited in claim 23, and "forming an ion conductor overlying the first electrode material, wherein the step of forming an ion conductor comprises exposing the first electrode material to a wet chemical oxidation process," as recited in claim 29 respectively.

Claims 2-8, 10-22, 24, 25, 27, 28 and 30-33 are also allowed as being directly or indirectly dependent of the allowed independent base claim.
